

PRESS RELEASE

September 2012

Vitrex Tile Care Range

New from QEP, the world's leading supplier of tiling & flooring installation equipment – the Vitrex Tile Care range.

Vitrex Tile Care is a range of 12 products specially formulated to Clean, Seal, Shine & Protect all the different types of tiles available and to keep them looking like new. The new range is attractively packaged in silver bottles with high impact, eye-catching silver foil labels and colour-coded caps to differentiate between the different types of products.

Cleaning products **Tile Polish & Wax Remover** and **Heavy Duty Tile Cleaner** are for tiles which require initial cleaning prior to sealing. This ensures that the tiles are in optimum condition before they are sealed.

Everyday Clean products **Grout Cleaner**, **Mould Remover**, **Marble & Slate Cleaner**, **Tile Cleaner & Disinfectant** and **Tile Clean & Shine** maintain the natural beauty of tiles with products designed for regular use.

Some natural tiles are porous and need to be sealed to prevent staining. Sealing products **Tile Sealer**, **Grout & Tile Sealer** and **Tile Seal & Protect** seal tiles prior to grouting to protect against grout stains, and seal again after installation to prevent stains from everyday spills.

Shine products **Floor Tile Polish** and **Tile Colour Enhancer** enhance the natural beauty and durability of tiles, improving the brilliance of tile colour & texture and protect against everyday stains.

The new Vitrex Tile Care range replaces the fast selling QEP branded range of tile care chemicals and contains two new, innovative formulations: Tile Cleaner & Disinfectant is a PH Neutral maintenance cleaner which removes a multitude of stains without the need for alkalis, acids, bleaches & solvents. And Tile Colour Enhancer which is an all-in-one colour intensifier and impregnator that enhances the natural colour and texture of tiles.

Vitrex – sign of a professional job
